16:00	End of Day

*Schedule may vary for each training

Applied Reliability - Centered Maintenance

29th - 31st July 2024 at Kuala Lumpur, Malaysia

Course Overview

The purpose of this course is to broaden the knowledge of the Reliability Centered Maintenance (RCM) process and illustrate how RCM can apply within an industry neutral application. The discussion will drive deeper into the various aspects of RCM and different methodologies applied (SRCM, RCM2, RCM Turbo, ..etc) in order to identify the most appropriate approach for a successful implementation. RCM introduces three basic concepts for asset management. Identify what is important, define what should be done, and change the existing programs is what RCM practitioners will possess and commune when applying the RCM process.

We will also study some techniques that will engage people to change the existing program, as well as explore general RCM project steps.

Course Objectives

In order to comprehend and practice these techniques, we will use a number of practical sessions – some simple examples to illustrate the principles, but also reconsider a number of technical RCM topics.

At the end of this course, you should:

- Know how to describe the RCM process flow
- Understand the importance of identifying and categorizing assets
- Understand criticality and the FMECA approach in RCM
- Understand how to develop a RCM analysis, as well as the implications of making the strategy work
- Understand the requirements for RC
- Recognize the importance of data structure and content before you do any kind of strategy work
- Understand RCM customization
- Understand why to conduct a task comparison
- Understand what work packaging is
- Understand how to implement RCM
- Recognize what a living program is
- Know the content of a RCM project plan

Specially Designed For

This course specially designed for the following disciplines:

- Maintenance and Reliability Engineers and Managers
- Engineering personnel and managers

IN-HOUSE SOLUTIONS

SAVE COST • IMPROVE PERFORMANCE • REDUCE RISK

PetroSync understands that in current economic climate, getting an excellent return on your training investment is critical for all our clients. This excellent training can be conducted exclusively for your organization. The training can be tailored to meet your specific needs at your preferred location and time. We will meet you anywhere around the globe.

If you like to know more about this excellent program, please contact us on +65 3159 0800 or email general@petrosync.com

Applied Reliability - Centered Maintenance

29th - 31st July 2024 at Kuala Lumpur, Malaysia

Training Agenda

Day 1 :

- Module 1: Setting the Scene (Course Introduction)
 - RCM History and introduction to the RCM Standards SAE JA1011, SAE JA 1012
