Masterclass on Carbon Capture and Storage

A masterclass for the development of skills, technology and knowledge of CCS

10th - 12th June 2026 at Kuala Lumpur, Malaysia | 15th - 17th June at Bangkok, Thailand 18th - 20th November 2026 at Kuala Lumpur, Malaysia | 23rd - 25th November 2026 at Bali, Indonesia

Petrosync Distinguished Instructor Richard Worden

- High ranking professor at the University of Liverpool, UK
- Led courses on CCS more than 44 times, to more than 760 people, from more than 42 organisations
- Expert in subsurface aspects of geological carbon storage (CCS) including characterisation (storage volume and injection rate) and effects (geochemical, geomechanical and petrophysical) of CO2 on reservoirs and seals
- Led courses and expert in the "Geochemical effects of CO2 on reservoirs, seals and engineered environments during CCS"

PROGRAM SCHEDULE		
08:00	Registration (Day1)	
08:00 – 10:00	Session I	
10:00 – 10:15	Refreshment & Networking Session I	
10:15 – 12:30	Session II	
12:30 – 13:30	Lunch	
13:30 – 15:00	Session III	
15:00 – 15:15	Refreshment & Networking Session II	
15:15 – 16:00	Session IV	
16:00	End of Day	

^{*}Schedule may vary for each training

HYBRID TRAINING SOLUTIONS

FOCUS TRAINING • REDUCE COST • ENHANCED RESULTS

Over the years, there has been a growing demand for hybrid training programs. It is an excellent option to maximize your training dollar for your specific training needs. We make it possible to run a training program that is customized totally to your training needs at a fraction of an in-house

If you like to know more about this excellent program, please contact us on +65 3159 0800 or email general@petrosync.com

Masterclass on Carbon Capture and Storage

10th - 12th June 2026 at Kuala Lumpur, Malaysia | 15th - 17th June 2026 at Bangkok, Thailand 18th - 20th November 2026 at Kuala Lumpur, Malaysia | 23rd - 25th November 2026 at Bali, Indonesia

Course Overview

Designed for technical staff, geoscientists, and engineers, this course offers a comprehensive dive into CCS (Carbon Capture and Storage). It begins with the fundamentals of CCS need and CO2 behaviour in the subsurface, supported by real-world data from current and past projects. You will explore CO2 storage capacities in saline aquifers and depleted gas fields, along with insights on injection rates, reservoir permeability, and pressure management. Key topics include reservoir and top-seal properties, geomechanics to prevent fractures, and the geochemistry of CO2 trapping. The course also covers CO2 leakage risks, monitoring, and risk assessment, providing a practical, science-driven approach to CCS challenges.

Course Objectives

During this course, you will:

- Explore the role of geoscience in CCS and its impact on CO₂ emissions reduction.
- Examine past CO₂ injection projects and their differences from industrial-scale CCS.
- Understand CO₂ behaviour in the subsurface, including injection pressures and stress regimes.
- Learn about CO2 storage capacities, from pore-scale to aquifer volumes.
- Analyze factors influencing CO₂ flow, including permeability and aquifer architecture.
- Investigate the effects of CO₂ on host aquifers, from geomechanical to geochemical impacts.
- Assess seal integrity and risks, from fracking to induced seismicity and leakage.
- Explore strategies for monitoring and ensuring safe, long-term CO₂ storage.
- Compare CCS in saline aquifers versus depleted gas fields.

Specially Designed For

This course is designed for technical staff, geoscientists, petrophysicists and engineers, most of whom will have had experience in oil and gas exploration and production projects; the course will allow you to adapt your existing petroleum skills for the new world of CCS. The course is also suitable for those from a technical background embarking on a career in the energy transition.

WHY YOU SHOULD ATTEND PETROSYNC'S EVENTS

- To ensure that all objectives of the course matches yours, all PetroSync programs are developed after intensive and extensive research within the industry
- PetroSync programs focus on your immediate working issues to ensure that you are able to apply and deliver immediate results in real work
- Application and implementation of industry knowledge and experience are the drivers for our course design, not theoretical academic lectures
- PetroSync training focuses on practical interactive learning tools and techniques including case studies, group discussions, scenarios, simulations, practical exercises and knowledge assessments during the course. Invest a small amount of your time to prepare before attending the course to ensure maximum learning
- PetroSync follows a rigorous selection process to ensure that all expert trainers have first-hand, up-to-date and practical knowledge and are leaders of their respective industrial discipline

Masterclass on Carbon Capture and Storage

10th - 12th June 2026 at Kuala Lumpur, Malaysia | 15th - 17th June 2026 at Bangkok, Thailand 18th - 20th November 2026 at Kuala Lumpur, Malaysia | 23rd - 25th November 2026 at Bali, Indonesia

Training Agenda

Day 1: Overview

Introductions and Context

Background on CCS and its role in reducing greenhouse gas emissions, with an exercise on changing greenhouse gas sources in developed nations.

Geological Storage Options

Overview of CCS history, types of projects, and extend of need to scale up CCS, with a related exercise.

• Evidence and Projects

Insights into CO₂-EOR, saline aquifer CCS, hub and cluster plans, and typical injection rates.

CO2 Properties and Storage

Phase behaviour, trapping mechanisms, and storage quantification in saline aquifers vs. depleted gas fields, with an exercise on phase and depth effects

Porosity in Storage Reservoirs

Typical values, porosity distribution in sandstones and carbonates

Case study and exercise: Porosity controls in CCS reservoirs.

Day 2

Storage Efficiency

Factors influencing CO2 trapping, including viscosity, buoyancy, and plume radius, with a comparison of efficiency in gas fields vs. saline aquifers. Exercise on storage efficiency influenced by (i) fluid viscosity and (ii) gravity effects.

CO2 Injectivity

Key role of permeability in injection rates, controls on permeability, and an exercise predicting injection rates

• Relative Permeability

Impact on CO2 flow, formation damage, and intraformational baffles, with an exercise on predicting effect of formation damage on injection rates.

Geomechanical Aspects

Effects of high-pressure CO2 on stresses, fault failure, and intact rock behaviour in saline aquifers and gas fields. Exercise on safe maximum CO2 injection pressure and thus injection rates.

Mineral Dissolution Processes

Mechanisms, extent, and evidence of dissolution, and its effects on storage and injection rates.

Case study and exercise: The range effects of dissolution on CO2 storage and injection rate.

Day 3

Mineral Precipitation Processes

Causes, controls, and likely extent of mineral precipitation during CO2 injection, including halite in saline aquifers and rapid mineral sequestration in basalts.

Top-Seal Attributes

Mudstone porosity, geochemistry, and effects of CO2, with an exercise on calculating maximum safe CO2 column height.

Leakage Risks

CO2 diffusion and advection through top-seals, leakage via wells, and interaction with well materials. Exercise on predicting potential leakage rates from saline aquifers.

Geomechanical Issues

Fault behavior under CO2 pressure, fault reactivation risks, and fracturing evidence. Exercise on predicting uplift from CO2 injection.

Monitoring CO₂ Injection

Purposes, methods, costs, and regulatory requirements, with a focus on risk assessment using immediacy versus severity matrices.

Case study and synthesis comparing the successful Sleipner (Norway) and the terminated In Salah (Algeria) CCS projects in terms of perception of leakage risk

Masterclass on Carbon Capture and Storage

10th - 12th June 2026 at Kuala Lumpur, Malaysia | 15th - 17th June 2026 at Bangkok, Thailand 18th - 20th November 2026 at Kuala Lumpur, Malaysia | 23rd - 25th November 2026 at Bali, Indonesia

Petrosync Distinguished Instructor Richard Worden

Professor of Geology at the University of Liverpool, UK Managing Director of Geochem Research Ltd Director of UK start-ups: Geo-engines Ltd and Hydrogen Resources Ltd

Richard H. Worden is a Professor of Geology in the Department of Earth, Ocean, and Ecological Sciences at the University of Liverpool, UK. He earned a BSc in Geology and Geochemistry (1981–1984) and a PhD in Geology from the University of Manchester (1984–1988). After research at the University of Edinburgh, he worked as a sedimentary geochemist at BP Sunbury, contributing to reservoir and geochemistry projects. He later became a lecturer at Queen's University Belfast before joining the University of Liverpool in 2000.

Prof. Worden collaborates with industry on advice, training, and joint research projects. His research focuses on geoscience applications in the energy transition (CO2 and hydrogen storage, nuclear waste disposal) and subsurface reservoir and top-seal studies using geochemistry, geochemical modelling, sedimentology, petrophysics, geomechanics, and machine learning.

Major Project List

- Reservoir and top-seal CO₂ geochemical interaction, Viking CCS site, UK (2023)
- Reservoir and top-seal CO₂ geochemical interaction, Aegean Basin, Greece (2023)
- Review of CCS prospects, UK: geochemical perspective (2015-2016)
- Reservoir and top-seal geomechanical, petrophysical and petrographic properties in Acorn and East Mey, UK (2018-present)
- Geochemical modelling (Phreeqc) the effects of CO₂ on reservoirs, seals and engineered environments during geological carbon storage (2023-present)
- Top-seal geomechanical, petrophysical and petrographic properties in East Irish Sea and Southern North Sea, UK, (2013-present)
- Top-seal geomechanical, petrophysical and petrographic properties in Salah, Algeria (2004-2012)
- Application of natural CO2-rich analogues to understand the behavior of injected CO2 (1999)

Partial Client List

- BP
- TotalEnergies
- Pale Blue Dot (Storegga)
- Saudi Aramco
- Dong Energy
- CNOOC
- North Sea Transition Authority
- Shell
- Perenco

- Energean
- Harbour Energy
- Eni
- Petrobras
- Equinor
- Sonatrach
- Halliburton
- **CEPSA**
- iSquared VC and more.

IN-HOUSE SOLUTIONS

SAVE COST • IMPROVE PERFORMANCE • REDUCE RISK

PetroSync understands that in current economic climate, getting an excellent return on your training investment is critical for all our clients. This excellent training can be conducted exclusively for your organization. The training can be tailored to meet your specific needs at your preferred location and time. We will meet you anywhere around the globe.

If you like to know more about this excellent program, please contact us on +65 3159 0800 or email general@petrosync.com

Please checklist the package that you are attending!

Masterclass on Carbon Capture and Storage SCHEDULES	LOCATION	PRICE
10 th - 12 th June 2026	Kuala Lumpur, Malaysia	USD 4,950
15 th - 17 th June 2026	Bangkok, Thailand	USD 4,950
18 th - 20 th November 2026	Kuala Lumpur, Malaysia	USD 4,950
23 rd - 25 th November 2026	Bali, Indonesia	USD 5,150

^{*} All prices are subject to change without notice and are not guaranteed, except that prices for an order that have been accepted by PetroSync is not subject to change after acceptance.

TERMS AND CONDITIONS

DISCLAIMER

Please note that trainers and topics were confirmed at the time of publishing; however, PetroSync may necessitate substitutions, alterations or cancellations of the trainers or topics or location (classroom / Virtual). As such, PetroSync reserves the right to change or cancel any part of its published programme due to unforeseen circumstances. Any substitutions or alterations will be updated on our web page as soon as possible

DATA PROTECTION

The information you provide will be safeguarded by PetroSync that may be used to keep you informed of relevant products and services. As an international group we may transfer your data on a global basis for the purpose indicated above. If you do not want us to share your information with other reputable companies, please tick this box

CANCELLATION POLICY

Delegates who cancel after the training is officially confirmed run by email, are liable to pay the full course fee and no refunds will be granted. You may substitute delegates at any time as long as reasonable advance notice is given to Petrosync.

In the event that PetroSync cancels or postpones or change the trainer or change the training location (classroom / virtual) of an event for any reason and that the delegate is unable or unwilling to attend in on the rescheduled date, you will receive a credit voucher for 100% of the contract fee paid. You may use this credit voucher for another PetroSync to be mutually agreed with PetroSync, which must occur within a year from the date of postponement.

PetroSync is not responsible for any loss or damage as a result of the cancellation policy. PetroSync will assume no liability whatsoever in the event this event is cancelled, rescheduled or postponed due to any Act of God, fire, act of government or state, war, civil commotion, insurrection, embargo, industrial action, or any other reason beyond management control.

DETAILS

Please accept our apologies for mail or email that is incorrectly addressed

Please email us at registration@petrosync.com and inform us of any incorrect details. We will amend them accordingly.
