Well Completion & Workover

Improving operations through a strategic approach on the key elements of well completion and workover

Date: 08th October 2012 – 12th October 2012
Location: Kuala Lumpur, Malaysia

Petrosync Distinguished Instructor
Michael Etuhoko, P.Eng., PMP
President & Founder, Protekz Inc Canada

- Over 22 years of engineering, operations, and management experience in Completion, Workover & Well Services, and Drilling
- Highly sought after Consultant, President & Founder of Protekz Inc Canada, an independent well and production engineering consultancy
- Leads major completion and workover projects with companies such as Shell Canada, KNOC, KPO etc in North America, Europe, Africa, Central Asia, & Far East Asia
- Authored and presented SPE Papers at the SPE Asia Pacific Oil & Gas Conference (Australia, 2004) & SPE Annual Technical Conference & Exhibition (Texas USA, 2004)

Testimonials

“Mike is highly professional, rigorous in analysis, and bold in exploring new ideas and technologies. He has a wide knowledge of the different aspects of well completion. I believe his highly varied experience would be appreciated by his audience.”
-- Reservoir Engineering Manager, Total E & P

“Mike demonstrated a very strong technical ability in planning, designing and supervising operations. I personally learnt a lot from him and I will gladly recommend him to anyone in the oil and gas industry for his services.”
- Well Completion Engineer, JVGAS (Statoil-BP-Sonatrach Joint Venture), Hassi Messaoud

“Mike is well respected within the Well Operations department among his peers and those he mentors. He has an excellent track record for adding value to the daily operations as well as update and review of technology that is used on our operations.”
-- Senior Panning & Performance Engineer, Karachaganak Petroleum Operating (KPO)

Supported by Worldoils, Asia Oil and Gas, Asia Oil and Gas, India Core, India Core, Energy China Forum, China Oil, China Gas, Asia Oil and Gas, Asia Oil and Gas, Asia Oil and Gas, Asia Oil and Gas, Asia Oil and Gas, Asia Oil and Gas
Masterclass Overview

Well completion is considered to be one of the most critical parts in the preparation for oil production. During the completion process, engineers identify the best strategy in designing a well in order to optimize oil retrieval later on. This presents a challenge because different reservoirs have various physical and chemical factors that should be taken into consideration when running the best type of well completion.

Later in the life of the well, it undergoes changes in its operations, affecting its production efficiency. When a well reaches this point where it is not performing at its optimal, well workovers and interventions are performed to remedy the situation. It is a challenge to address any well inefficiency with the best workover strategy at the least amount of time and cost.

This course addresses the above needs of engineers in both well completion and workover. It will focus on building the current foundation of engineers on completion and workover techniques, but will further provide practical exercises and industrial applications on the key decisions needed to be made during the completion and workover processes. Moreover, an in-depth discussion on the emerging technologies and methodologies on well completion and workover would be covered. This includes the techniques such as Smart Well Completion, Multi-lateral Well Completion, HPHT Completions, Sub-sea Completions, and Fiber Optics Completions. The discussion shall go in-depth on the features, benefits, and costs for each type of technique. This course will address how to tackle the common well environments and also the extreme well problems engineers may face during completion and workover processes. At the end of the training, a field project design exercise will be given to culminate all lessons presented throughout the course.

Masterclass Objectives

- IDENTIFY & UNDERSTAND the parameters that influence selection and design of completion components
- INTEGRATE the importance of completion process to future production run
- DELIVER techniques to selecting best tubing size and best material for completion
- GAIN practical methods in designing, planning, and executing safe and efficient well completion
- MANAGE well environments with extreme chemical, temperature, and pressure characteristics
- BRIDGE the importance of well design in relation to the ability to carry out well interventions
- EXPLORE new technological developments in well completions and workovers
- PLAN an appropriate intervention and workover strategy to maintain or increase field production

Specially Designed for

The course is designed for, but not limited to Completion Engineers, Workover Engineers, Production Engineers, and those who are involved with well completions, workovers, well interventions, and production.

- Completion Engineer
- Workover Engineer
- Well Services / Intervention Engineer
- Production Engineer
- Drilling Engineer
- Well Site Engineer

Petrosync Quality

Limited Attendees
The course has limited seats to ensure maximum learning and experience for all delegates.

Certificate of Attendance
You will receive a Certificate of Attendance bearing the signatures of the Trainer upon successful completion of the course. This certificate is proof of your continuing professional development.

Interactive Training
You will be attending training designed to share both the latest knowledge and practical experience through interactive sessions. This will provide you with a deeper and more long-term understanding of your current issues.

High Quality Course Materials
Printed course manual will provide you with working materials throughout the course and will be an invaluable source of reference for you and your colleagues afterward. You can follow course progress on your laptop with soft copies provided.
Course Introduction & Overview
Introduction to Completion Design
  - Field Life Cycle
  - Completion Design Overview
  - Completion Design Data Requirements
  - Designing an Efficient and Safe Well
  - Understanding the Completion Design Process
  - Team Integration During the Design Process
  - Types of Completions
Exercise: Introduction to Field Development
Reservoir Completion
  - Introduction to Inflow Performance (PI, Skin, etc)
  - Cased and Perforated Completion
  - Introduction to Fracturing
  - Open-Hole Completions
  - Sand Control Completions
  - Impact on Future Interventions
Exercise: Reservoir Completion
Importance of Design & Installation Process To Completion Running & Well Interventions

DAY 2
Handling Different Well Environments (Discussion & Case Studies)
  - Deep wells
  - Light Oil/Condensate Gas
  - High GOR
  - H2S > 5%
  - CO2 > 5%
  - Low Porosity
  - Low Permeability
  - HPHT Reservoir Environment

Tubing Stress Analysis
  - Purpose of Stress Analysis
  - Stress Loads
    - Stress and Strain
    - Axial Loads
    - Burst/Collapse
    - Tri-Axial Analysis
  - Safety Factors and Design Factors
  - Load Cases
  - Completion Equipment and Connections
Class Exercise: Tubing Stress Calculations
Material Selection
  - Metals
  - Metallurgy & Corrosion
  - Elastomers & Plastics
  - Protective Coatings
Completion Components
  - Completion Philosophy
  - Completion Components
    - Christmas Tree, Tubing Hangers, Tubing Downhole Safety Valve, Packers, Tail Pipes, Expansion Devices, Nipples, Mandrels, Gauges, Etc
  - Interface with Reservoir Completion
Group Work: Well Completion Design

IN-HOUSE SOLUTIONS
SAVE COST • IMPROVE PERFORMANCE • REDUCE RISK

PetroSync understands that in current economic climate, getting an excellent return on your training investment is critical for all our clients. This excellent training can be conducted exclusively for your organization. The training can be tailored to meet your specific needs at your preferred location and time. We will meet you anywhere around the globe.

If you like to know more about this excellent program, please contact Jerry Tay (Conference Director) on +65 6415 4502 or email jerry.t@petrosync.com
WHY YOU SHOULD ATTEND PETROSYNC’S EVENTS

- To ensure that all objectives of the course matches yours, all PetroSync programs are developed after intensive and extensive research within the industry.
- PetroSync programs focus on your immediate working issues to ensure that you are able to apply and deliver immediate results in real work situations.
- Application and implementation of industry knowledge and experience are the drivers for our course design, not theoretical academic lectures.
- PetroSync training focuses on practical interactive learning tools and techniques including case studies, group discussions, scenarios, simulations, practical exercises and knowledge assessments during the course. Invest a small amount of your time to prepare before attending the course to ensure maximum learning.
- PetroSync follows a rigorous selection process to ensure that all expert trainers have first-hand, up-to-date and practical knowledge and are leaders of their respective industrial discipline.

WELL COMPLETION AND WORKOVER

8th - 12th of October 2012

DAY 3

Rig Preparation and Completion Installation Process
- Operation Planning
- Equipment Shipping
- Equipment Reception
- Pre-Job Meeting
- Casing Cleaning Operation
- Running Inhole the Completion Equipment
- Well Clean-Up
- Reporting
- After-Action Review

Emerging Completion Techniques
- Fiber Optics (Distributed Temperature System)
- Flow Control Valves (FCV)
- Formation Isolation Valve (FIV)
- Intelligent and Smart Completion
- Multi-Lateral Wells
- Underbalanced Completion

Introduction to Well intervention

Benefits of Well Intervention

Well Intervention Methods
- Workovers / Service Rigs
- Coiled Tubing
- Snubbing Unit
- Wireline (Slickline & E-Line)
- Intervention in Sub-sea Wells
  - Horizontal Tree
  - Conventional Tree
- Intervention in HP-HT Wells
- Hydrate Remediation

New Intervention Techniques
- Lightweight Intervention System
- Intelligent Well Intervention

DAY 5

Well Control
- Well Control Equipment
  - Blowout Preventer System Requirements
  - Choke Manifold
  - Circulating System
- Kicks and Its Causes
- Well Killing Operation
  - Forward Circulation
  - Reverse Circulation
  - Bullheading
  - Lubricate and Bleed

Class Exercises: Well Control

Workover Operations
- Workover Definition and Description
- Workover Types
  - Safety Workover (SWO)
  - Long Term Suspension (LTS)
  - Plug and Abandonment (P&A)
  - Production Enhancement (PE)
- Fishing Operations

Case Study: Workovers

Integrating Completion and Workover Operations

Industry Best Practices and Worst Practices
- Lessons and Common Mistakes During Well Completion and Workover Operations

Feasibility Studies (incl. Workover Economics)

Operations Cost Management

Handling Service Providers
- Service Management Role
- Contingency Plans

Conclusion & Course Wrap-up

Michael (Mike) Etuhoko is a well known consultant and founder of Protekz Inc Canada, an independent well and production engineering consultancy company. He has over 22 years of experience in the Oil & Gas industry. He has led major projects & trainings for major companies in Europe, North America, Africa, Central Asia, and Far East Asia. Mike currently consults worldwide in the area of Well Completion, Workover and Well Services, Sand Control, and Formation Damage Prevention and Treatments. Before working as a consultant, he has served several years in Shell and Total E&P, which has equipped him with a solid foundation in well completion and workover practices.

His Current and Recent Assignments Include the Following:

- **Lead Completions & Intervention for Karachaganak Field, Kazakhstan**
  Completion & Intervention for Field with Characteristics: Deep wells (± 6200m TVD on the average), light oil/condensate and gas, High GOR, H2S > 7%, CO2 > 6%, low porosity, low permeability and HPHT reservoir environment

- **Subsea Intervention/Workover/Completion for Korean National Oil Company**
  Diagnose and restore Donghae 1-4P Sub-sea well back to production

- **Completions, Sand Control, & Well Testing (Deepwater Exploration Asset) for BG Nigeria**
  Responsible for “Well Completion and Testing” operations in deepwater exploration campaign

- **Well Productivity for Total E&P**
  Scales Squeeze treatment for Dunbar, Alwyn, Otter and Elgin/Franklin fields; Fracturing design and operations in HPHT wells; Sand Control in HPHT wells, Water shut-off in HPHT wells

Mike has presented for several international conferences including Offshore Technology Conference, SPE Asia Pacific Oil & Gas Conference, and SPE Annual Technical Conference Exhibition. He has also authored SPE papers on “Monobore Completion Using Interventionless Technology” and “Open Hole Multistage Fracturing Completion in Carbonate Reservoir.”

In the recent years, Mike has provided intensive trainings in well completion and workovers with different oil and gas companies. Some of these training are “Well Completion & Intervention Training (Level 1&2)” for KPO, “Sub-Sea Workover Operations Training” for KNOC, and “Deep Water Sand Control” for Total E&P International.

**Client List**

Mike Etuhoko has worked with the following companies as consultant and trainer, and has been deployed worldwide for various major completion and workover projects:

- Shell
- Total E&P International
- Chevron
- BG Nigeria
- Karachaganak Petroleum Operation (KPO) (Kazakhstan)
- Korean National Oil Company
- ENI-AGIP
- Luke Oil (Indiana, US)
- JVGas (Algeria)
- & Many Others
Course Details

Title: Well Completion and Workover
Date: 8th to 12th of October 2012
Location: Kuala Lumpur, Malaysia

INVESTMENT PACKAGES

<table>
<thead>
<tr>
<th>Investment Package</th>
<th>Deadline</th>
<th>Standard Price</th>
<th>Early Bird Offer</th>
<th>Group Discount (3 or more Delegates)</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td>SGD $5,995</td>
<td>SGD $5795</td>
<td>10% discount for groups of 3 registering from the same organization at the same time</td>
</tr>
</tbody>
</table>

Group Discount is based on Standard Price
- To enjoy the promotion & discount offer, payment must be made before deadline
- For 7 or more delegates, please inquire for more attractive package.
- Prices include lunches, refreshments and materials. Promotion & discount cannot be combined with other promotional offers.
- Important: Please note that registration without payment will incur a SGD 200 administration fee.

DELEGATES DETAILS

PAYMENT METHODS

☐ By Credit Card : ☐ Visa ☐ MasterCard ☐ AMEX Security Code: ____________
Card Number: __________________________ Expiry Date: ____________

☐ By Direct Transfer : Please quote invoice number(s) on remittance advice
PetroSync LLP Bank details:
Account Name: PetroSync LLP
Bank Number: 7144 • Branch Code: 001 • Account No: 010-2255-105
Name of Correspondent Bank : Standard Chartered Bank, 6 Battery Road,
Singapore 049909
SWIFT Code of Correspondent Bank: SCBLSGSGXXX
All bank charges to be borne by payer. Please ensure that PetroSync LLP receives the full invoiced amount.

Confirmation

I agree to PetroSync’s terms & conditions, payment terms and cancellation policy.

Authorized Signature: ______________________

PAYMENT TERMS : Payment is due in full at the time of registration. Full payment is mandatory for event attendance.

TERMS AND CONDITIONS

DISCLAIMER
Please note that trainers and topics were confirmed at the time of publishing; however, PetroSync may necessitate substitutions, alterations or cancellations of the trainers or topics. As such, PetroSync reserves the right to change or cancel any part of its published programme due to unforeseen circumstances. Any substitutions or alterations will be updated on our website as soon as possible.

DATA PROTECTION
The information you provide will be safeguarded by PetroSync that may be used to keep you informed of relevant products and services. As an international group we may transfer your data on a global basis for the purpose indicated above. If you do not want us to share your information with other reputable companies, please tick this box ☐

CANCELLATION POLICY
You may substitute delegates at any time as long as a reasonable advance notice is given to PetroSync. For any cancellation received in writing not less than fourteen (14) working days prior to the training course, you will receive credit voucher less a SGD $200 administration fee and any related bank or credit card charges.

Delegates who cancel less than fourteen (14) working days of the training course, or who do not attend the course, are liable to pay the full course fee and no refunds will be granted.

In the event that PetroSync cancels or postpones an event for any reason and that the delegate is unable to attend on the rescheduled date, you will receive a credit voucher for 100% of the contract fee paid. You may use this credit voucher for another PetroSync to be mutually agreed with PetroSync, which must occur within a year from the date of postponement.

PetroSync is not responsible for any loss or damage as a result of the cancellation policy. PetroSync will assume no liability whatsoever in the event this event is cancelled, rescheduled or postponed due to any Act of God, fire, act of government or state, war, civil commotion, insurrection, embargo, industrial action, or any other reason beyond management control.

PAYMENT METHODS

☐ By Credit Card : ☐ Visa ☐ MasterCard ☐ AMEX Security Code: ____________
